CAREER OBJECTIVE

Versatile Computer Applications undergraduate with hands-on fresher experience across both web development (React, TypeScript) and data science (Python, SQL, ML), built through 7 internships and multiple live, deployed projects. Comfortable building responsive user interfaces as well as deriving data-driven business insights — seeking a Software Engineer, Web Developer, or Data Analyst role.

EDUCATION

Shri Ramswaroop Memorial University (SRMU), Lucknow 2024 – 2027 (*Expected*)

Bachelor of Computer Applications (BCA) — Data Science & AI

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript, Python, SQL, Java, C/C++
- Web / Frontend: HTML, CSS, React, Tailwind CSS, Vite | Backend & APIs: Flask, REST APIs
- Data Science & ML: NumPy, Pandas, scikit-learn, EDA, Linear/Logistic Regression, KNN, Decision Trees
- Visualization & BI: Matplotlib, Seaborn, Power BI, Tableau, IBM Cognos
- Databases: SQL, MongoDB, DBMS | Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

PROJECTS

Scentoria — Luxury Perfume Storefront | React, TypeScript, Tailwind CSS, Vite — GitHub

- Built a responsive e-commerce catalog with product search, filtering, wishlist, and cart (add/remove, quantity) using reusable, type-safe React components with a dark glassmorphism UI; deployed on Render.

Customer Churn Analysis | Python, Pandas, Matplotlib, Seaborn — GitHub

- Analyzed telecom churn across contract type, payment method, and tenure via EDA; found month-to-month customers churn at ~42% vs. far lower on long-term contracts, and <1-year tenure customers churn at ~50%.

QuantumMark — Secure Image Watermarking | Python, Flask, NumPy — GitHub

- Built an LSB-based watermarking system with embedding/verification workflows, evaluated using PSNR, SSIM, and entropy metrics; tested robustness against compression, noise, rotation, and cropping.

Blinkit Sales & Operations Dashboard | Power BI — GitHub

- Built an interactive Power BI dashboard analyzing \$1.2M+ in sales across 8,500+ items with KPI tracking, filter panels, and segment-level insights (e.g., Tier-3 outlets showing highest profitability).

WeatherNow | HTML, CSS, JavaScript, REST API — GitHub

- Developed and deployed a weather web app fetching and rendering live public API data, hosted on GitHub Pages.

INTERNSHIP EXPERIENCE (7 INTERNSHIPS)

Cognifyz Technologies — Frontend Development Intern

- Completed 6 frontend tasks building responsive web interfaces with HTML, CSS, and JavaScript.

CodSoft — Data Science / ML Intern

- Built 3 ML projects in Python — Titanic Survival Prediction, Iris Classification, Car Sales Prediction.

Prodigy InfoTech — Development Intern

- Completed 5 structured development tasks in a task-based internship program.

FlyRank AI — AI Intern *Ongoing*

- Contributing to AI-focused projects and tasks, nearing completion.

Additional Internships — Saiket Systems, CodeAlpha, Horizon TechX

- Contributed to frontend development (Saiket Systems, CodeAlpha) and data science tasks (Horizon TechX).
